THE CALCULATIONS ARE MADE TO APPARENT TIME, AND
THE TIDES FOR CHARLESTON BAR.
CHARLESTON, S. C.
Printed, Published and Sold, WHOLESALE & RETAIL
By A. E. MILLER, No. 3 State Street.
And Sold by the Booksellers generally throughout the State.
May 2. 5
May 29
June 15
June 19
Nov. 30
Dec. 10th

I will meet Dr. E. Gibbes, Charles H. Simonton, R. N. Gourdin, E. C. Jones, Dr. A. G. Mackey, R. C. Gilchrist, Jacob Cohen, and Wm. S. Elliott.

Anniversary second Tuesday in June.

President — E. H. Frost.
Vice President — J. B. Desaussine.
Recording Secretary — R. C. Chapman.
Corresponding Secretary — J. H. Cole.
Librarian and Treasurer — Eugene Buhr.

Trustees for Accounts — Chas. H. Simonton, Chairman; R. N. Gourdin, E. C. Jones, Dr. A. G. Mackey, R. C. Gilchrist, Jacob Cohen, and Wm. S. Elliott.

Apprentices Library Society:
President — Dr. Joseph Johnson.
Vice President — Hon. W. D. Fort.
Recording Secretary — J. H. Cole.
Corresponding Secretary — J. H. Cole.
Librarian and Treasurer — Eugene Buhr.
Astronomical Characters Explained.

At head of the page, for each calendar month, will be found a figure representing the sign of the Zodiac, into which the Sun enters during the month, according to the seasons, which begins with Pisces, the Fishes, on the 20th of March, the Vernal Equinox.

Signs of the Planets, &c.

<table>
<thead>

<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

The Twelve Signs of the Zodiac, and those parts of the body which they are supposed to govern, added.

Commonly called the Anatomy of Man's Body.

### Spring Signs
1. ♓ Pisces.

### Summer Signs
4. ♉ Gemini.
5. ♋ Cancer.
6. ♌ Leo.

### Autumn Signs
7. ♍ Virgo.
8. ♎ Libra.

### Winter Signs
10. ♐ Sagittarius.
11. ♑ Capricornus.

To know where the sign is.—First find the day of the month, and against it, in the 7th column, stands the sign the moon is in; then finding the sign here, it shows the part of the body it is supposed to govern.

### Notes to the Reader

**Clock Time and Apparent Time.**

1st.—There are two kinds of time used in common Almanacs for the Sun's rising and setting: one is clock-time, and the other is sun-time, or apparent time. Clock-time is always correct; but apparent time varies every day, and is alternately too "fast" or too "slow" of the clock.

This Almanac is calculated in Apparent-Time, and is in accordance with the old method. Almanacs in apparent time are known by the Sun's rising and setting when added, being equal to 12 hours; and at the time of its crossing the equator the rising and setting is at 6 o'clock. Such Almanacs are old fashioned, and are coming into disuse. They are not correct according to true time, and can be made so only by adding the amount the Sun is slow of the clock, and subtracting when it is "fast."

The Sun has not, since it was created, risen or set at six o'clock when it was at the equinoxes. And why? Because it does not come to the meridian at 12 o'clock at that time, a fact that is true for nearly every day in the year. The old idea that it is 12 o'clock when the shadow is at the noon-mark, is a mistaken one; and if timepieces be set at 12 at those times they will not be correct, except on the 15th of April and June, September 1st, and December 24th. Noon and 12 o'clock are not the same.

The irregularity of the Sun's motions causes the two kinds of time, and, in consequence of this variation, no dependence can be placed on the Sun for true time without knowing when it is in the meridian. This information we give for this Almanac. See the Sun in Meridian, at the head of each Calendar page.

2d.—The rising, and setting of a star, may be carried several days backwards, by adding, or forwards, by subtracting four minutes per day.

3d.—As the days end at midnight, the rising, and setting of the Moon when after that time, will be found in the morning of the succeeding day, &c.

4th.—The times given for High Water are for that tide which succeeds the Moon's passage over the Meridian, and is computed from the United States Coast Survey Tide Tables, and are correct. The winds will vary the tides.

Latitude of St. Michael's Church, - 32° 46' 33" North.
Longitude do do - - - 78° 57' 27" West.

### The Seasons

- **Vernal Equinox, March 20, 3h 25m ev.**
- **Autumnal Equinox, Sep. 23, 2h 8m mo.**
- **Summer Solstice, June 21, 0h 01m mo.**
- **Winter Solstice, Dec. 21, 8h 2m ev.**
Calendar of Fasts, Festivals and Other Days, 
Observed by the Israelites, 
FOR THE YEAR 5622, 
(Being their complete Leap Year, containing 385 lunar calculation,) 
and part of the year 5623 corresponding with the solar year 
of our Lord 1862.

The anniversaries marked with an asterisk (*) are to be strictly observed — Levit. ch. 23.

ANNEXED IS A

TABLE

Showing the Parashoth (portions of the Pentateuch,) which are read in the Synagogue on the Saturdays during this year. When Festivals however, fall on a Saturday, the regular Parashah is not read, but the appropriate portion for that particular Feast.
I. JANUARY, begins on Wednesday, hath 31 days. 1862.

Sow peas, spinach, lettuce, cabbages, radishes, parsley, beets, carrots, salsify, parsnips, turnips, asparagus. Plant horse radish, Irish Potatoes. Transplant cabbages and lettuce. REMARKS.—The best variety of peas for this month, are the early frame and Bishops, for an early crop, and dwarf green imperial for a succession. The lattuces, cabbages and radishes should be protected, the last may be sown between rows ot carrots, or spinach. Celery earthed. Endive tied up. Dress artichoke and asparagus beds.

II. FEBRUARY, begins Saturday, hath 28 days. 1862.

Sow peas, spinach, lettuce, cabbage, radish, corn, beets, carrots, saffron, parsnip, turnips, thyme, sage and other herbs. Plant Irish potatoes. Transplant cabbages and lettuce. Remarks.—The same varieties of peas may be sown in this month, as were directed for the last. The principal crop of beets and carrots should now be sown. The common varieties of spinach should be sown in small quantities once in ten days, as it soon runs to seed.

Sundays after Ember Days, are the stated times for Ordination.
The Diocesan Convention of the P. E. Church in South-Carolina, meets this year at Charleston S. C., on Wednesday the 12th of Feb.
III. MARCH, begins on Saturday, hath 31 days, 1862.

Sow carrots, beets, Swiss chard, parsnips, salsify, cabbages, spinach, turnips, leeks, tomatoes, peppers, radishes, lettuce and Guina squarsh. Plant cucumbers, okra, squashes, melons, snap beans, cushaws, sweet beans, New Zealand spinach. Transplant tomatoes, peppers, Guina squash, cabbages and lettuce. 

REMARKS — The above vegetables should be got in as early as possible. Carrots should be sown plentifully. Lettuce separately. Radishes should be sown every three weeks. Irish potatoes should not be planted later than this month.

Sow carrots, beets, salsafy, turnips, cabbages, cauliflowers, broccoli, tomatoes, peppers, radishes, lettuce, celery, leeks. Plant okra, snap-beans, sweetpeas, squashes, cucumbers, bush beans, melons.

Transplant cabbages, tomatoes, peppers, Guinea squashes. Prick out celery. REMARKS.—Carrots for summer and autumn, should be sown this month.

Cucumbers, squashes and melons, if they have been neglected or destroyed, may now be sown. The same remark applies to beets, salsafy, parsnips and turnips. Lettuces are uncertain; Green glazed cabbage only, to be set out this and the succeeding months.
MAY, begins on Thursday, hath 31 days. 1862.

Sow cabbages, beets, savoys, carrots, turnips, cauliflowers, broccoli, celery, radishes. Plant snap-beans. Transplant cabbages. Prick out celery. REMARKS. There is not much probability of either beets, parsnips, carrots, turnips succeeding at this season, especially the last, yet if wanted, a few may be ventured—under very favorable circumstances they may succeed. If carrots be sown, the ground should be shaded and kept moist, and this protection continued for some time after they are up, or they will be killed by sun.

First Q 6th, 10h 5m even.
Full ☽ 13th, 5h 41m even.
Last Q 20th, 10h 20m morn.
New ♀ 28th, 10h 7m morn.

Wax on Meridian, after 11.

To find the length of any day in the year, simply multiply the time of the Sun's setting by 2.
Sow early Dutch turnips, rutabaga, carrots, parsnips, cabbages, cauliflowers, broccoli, endive, radishes, spinach. Plant snap-beans, Irish potatoes, melons. Transplant cabbages, celery, cauliflowers, broccoli, tomatoes, and leeks. Remarks—A few carrots, parsnips, spinach or radishes should be sown, and while young, should be protected from the sun. The early Dutch turnips should be sown in small quantities towards the last of the month. The Irish potatoes will be fit for use in October, and tomatoes when the spring sown crop ceases.

First Q 4th, 5h 31m even.
Full 22d, 8h 19m morn.
Last Q 26th, 3h 46m even.
New 30th, 3h 46m morn.

Sun on Meridian after 12.

VIII. AUGUST, begins on Friday, 31 days. 1862.

Sow peas, early Dutch and other varieties of turnips, ruta baga, onions, cabbages, cauliflowers, broccoli, black Spanish radishes, radishes, carrots, beets, parsnips, salsify, lettuce and endive. Plant snap-beans. Transplant cabbages, cauliflowers, broccoli, celery, ruta baga and endive. REMARKS.—Not much can be expected from peas sown in this month, as they will be very much crippled by the high winds and rain. The beets and spinach are liable to the attacks of the worms, which destroy their leaves, they may be very fine.

First Q 2nd, 11h 37m even.
Full ☼ 9th, 4h 34m even.
Last Q 17th, 4h 28m morn.
New ☑ 25th, 4h 12m morn.

IX. SEPTEMBER, begins Monday, hath 30 days. 1862.

Sow early Dutch and other varieties of turnips, rutabaga, beets, Swiss chard, mangle wurtzle, carrots, parsnips, salsafy, lettuce, spinach, cabbages, (English seed,) onions, radishes, endive. Plant snap-beans. Transplant rutabaga, cabbages, cauliflowers, broccoli, celery, lettuce, leeks, endive.

REMARKS.—In this month, the principal crops of turnips, beets, carrots, parsnips, &c., should be sown, as they will acquire sufficient strength to withstand the cold weather before the winter sets in. When thinning out the rutabaga, the plants should be reserved and transplanted out into the spaces, where they have failed.

Sow cabbages, lettuce, carrots, beets, turnips, radishes, spinach, salsify, parsnips, rutabaga. Transplant cabbages, cauliflowers, broccoli, onions, lettuce, leeks and endive. **Remarks.**—If any of the crops recommended above have not been sown, they should not be neglected longer, most of them may be yet sown with considerable advantage.

The artichokes should in this month be attended to, the suckers removed, and manure given. Strawberries should be set out in this month.

XI. NOVEMBER, begins Saturday, hath 30 days. 1862.

Sow peas, cabbages, radishes, carrots, spinach, turnips, parsnips, lettuce, beets, salafy. Plant mazagon and windsor beans. Transplant cabbages, lettuce, onions, and leeks. Remarks.—The crops sown about the commencement of this month, and a general crop towards the last, though it is best to defer this until the next month. The dwarf marrowfat and dwarf gentry imperial, are the best varieties for the sowing. The asparagus beds should now be dressed, and a good supply of manure given.

Sow peas, spinach, radishes, carrots, salsify, lettuce, cabbages, beets, parsnips. Plant Irish potatoes, mazagon and windsor beans. Transplant cabbages, lettuce and onions. **Remarks.**—Any of the varieties of peas may be sown this month. The Irish potatoes will come up so early as to have their tops destroyed by frosts, but they will not be injured materially, if at all, by this. All seed sown during this month, except spinach, peas and beans, must be protected during the cold weather.

The College of Charleston.

UNDER THE PROTECTION AND SUPPORT OF THE CITY COUNCIL.

The College of Charleston is endowed by the late Elias Horry with a Professorship of $10,000. The College is managed by a Board of 21 Trustees, the Mayor and Recorder of the City for the time being, are ex-officio members, and three Aldermen to be elected by Council annually. An annual meeting of the Trustees is held on the 3d Wednesday in October, at the College, to elect a President of the Board of Trustees, and such other officers as may be deemed necessary. The Faculty to consist of a President, and such Professors, as may be appointed by the Trustees, neither of whom can hold the office of Trustee.

OFFICERS AND MEMBERS OF THE BOARD OF TRUSTEES.
Hon. MITCHELL KING, President.
DANIEL RAVENEL, Esq., Vice-President.
JACOB WILLIAM, Esq., Secretary and Treasurer.

FACULTY.—N. R. Middleton, 1. L.D. President, Prof. of Logic, Political Economy, and the Evidences of Christianity and Horry Professor of Moral, Intellectual and Political Philosophy;—William Hawkesworth, A. M. Professor of Latin and Greek Languages and Literature, and of Roman & Greek Antiquities;—Lewis R. Gibbes, M. D., Professor of Mathematics, Chemistry, &c. &c.;—Frederick A. Porcher, Professor of History, Ancient and Modern; Rhetoric, Belles Lettres, English Composition & Eloquence;—F. S. Holmes, Professor of Zoology, in all its branches; Geology and Paleontology, and Curator of the Museum;—Rev. James W. Miles, A. M. Professor of Intellectual Philosophy and Greek Literature, and Librarian to the College Library. Lewis R. Gibbes, M. D. Secretary to the Faculty.

Lunatic Asylum—Columbia, S. C.

J W Parker, M D, Superintendent and Physician.
A A Sylvester, Assistant Physician; Rev. E B Hort, Chaplain and Secretary; Mrs. Emily McCraty, Matron.

Requisites for Admission.—A Certificate from two Physicians and a Magistrate, that the applicant is insane, an epileptic, or an idiot. A complete history of the case and the medical treatment to which the patient has been subjected. The rates vary from $250 to $700 per annum, payable in half yearly instalments in advance. A bond, with approved security, living within the State, to secure the regular payment of the dues, is required. The charge for persons of color the same as paupers.

It will be seen by reference to the Report of the Physician and Superintendent, that the year opened with 194 patients, 88 pay-patients, and 106 paupers; and of these, 99 were males, and 95 females. 69 have been received in the course of the year, and the whole number which has been under treatment, is 263. 37 have been discharged cured, 8 removed in an improved state, and 26 have died. Most of the dead had been long in a state of incurable disease, with broken down constitutions, and their speedy death was anticipated. On the 5th inst., there were 192 patients; of this number, 104 were paupers, and 88 pay-patients; 86 males, and 106 females.

A. E. MILLER,
PRINTER AND PUBLISHER, No. 3, State-Street,
Where he will be ready to execute any work in his business, and to receive Orders for his Almanac for 1862.—The price of which, this year will be eight dollars per 100, $1.25 per doz. and 15 cts single.
NEW TIDE TABLE.
Prepared expressly for Miller's Planters' & Merchants' Almanac.

The following Table exhibits the intervals of time respectively, which are to be applied to the time of High Water at Charleston Bar, to find the time of High Water at the places named. All the given times are to be added, excepting those to which the letter S is prefixed, which are to be subtracted.

The actual rise of the Tides depends on the strength and direction of the wind, and it not infrequently happens that a Tide which would, independently of these, have been small, is higher than another, otherwise much greater. But when a Tide which arrives when the Sun and Moon are in favorable position for producing a great elevation, is still further increased by a very strong wind, the rise of the water will be uncommonly great, sufficient perhaps, to cause damage.

The interval called the Establishment of the Port, is the time which elapses between the southing of the Moon and the High Water, at a time when the Sun and Moon are both South at the same time. Now as the Establishment of the Port, if it were known, would enable us to find the time of high water at any time; so from a good Observation at the time of high water at any time, we can determine the Establishment of the Port. For many of our principal ports we have arrived at a close approximation in this respect. For Boston, 11h 7m. is now used as the Establishment of the Port; for New York, 8h 9m.; for Charleston, 7h 2m., &c.

The Table above, is corrected from the Official Tide Table, published by A. Bache, Superintendent United States Coast Survey. But only those ports, or places, indicated by an asterisk (*) are corrected. The others remain as they have been for a long time, and are supposed to be nearly correct.

SAMUEL H. WRIGHT,
CHARLTON H. BIRD,
SUCCESSOR TO JOHN S. BIRD & Co.
At the Sign of the Gold

225 - 225
