Household Economy.—A great deal may be saved a family, and order and comfort promoted, by the mistress knowing how things should be done, though she may not be required, in all cases, to do them herself. And a vast deal is wasted, and many families ultimately reduced to want, for lack of economy in the household, and of intelligence and good supervision on the part of the mistress. The duty of women is to manage well the affairs of the household; and to qualify them for the performance of this duty, girls should learn what they ought to practice when they become women. Nothing is so great an accomplishment in a young married female—nothing of which a young husband is so proud—and certainly very few things so conducive to the welfare and happiness of the married life—as a familiar acquaintance with domestic duties, and a cheerful willingness to perform them with fidelity.

To make Potato Bread.—Wash and boil good sized potatoes, peel and mash them fine, or pass them through a sieve; add two or three parts of flour, to one of potatoes, and a little more yeast than usual. Knead well, and allow the dough to stand a proper time to ferment, and bake. The bread is as palatable to many, and as wholesome, as wheaten bread, and effects a great saving of flour, which may be an object in scarce times.
RULE FOR FINDING THE DAY OF THE WEEK ON WHICH ANY GIVEN YEAR BEGINS.

Divide the date by 4 and add the product to the date, disregarding fractions; then divide the amount by 7, and if there be no remainder, the first day of January for the given year will be Sunday; if one remainder, it will be Monday; if two, Tuesday, &c. If, however, in dividing by 4 there be no remainder, the first of January will be one day earlier. Thus:

\[
\begin{align*}
4) 1839 \\
459 + 3 \\
7) 2298 \\
328 + 2
\end{align*}
\]

0 is Sunday, 1 Monday, 2 Tuesday: hence, as there was a remainder in dividing by 4, the first of January, 1839, was Tuesday.

\[
\begin{align*}
4) 1844 \\
461 + 0 \\
7) 2305 \\
329 + 2
\end{align*}
\]

0 is Sunday, 1 Monday, 2 Tuesday; but as there was no remainder in dividing by 4, the first day of January, 1844, was one less, or Monday.

If there be a remainder when you divide by 4 and none when you divide by 7, the first of January for the given year will be Sunday; but if there be no remainder when you divide by 4 and none when you divide by seven, the first of January will be Saturday. Hence, one remainder when you divide by 7 will make Monday or Sunday, as the case may be, &c.

Having found the day of the week on which the year entered, the day of the week for any month in the year may be found by the following old and familiar rule:

1st. 4th. 4th. 7th. 2d. 5th. 7th. 3d. 6th. 1st. 4th. 6th.

Explanation.—The first seven letters of the alphabet are taken, and a part of them repeated to make twelve, one for each month. The above table will now be easily understood. If January, represented by A, comes in on any given day, say Sunday, then February will enter on Wednesday, the fourth day from Sunday, as D, which represents February, is the fourth letter from A.; and so April will enter on Saturday, the seventh day from Sunday, as G is the seventh letter from A., and so on with each month.

As it is difficult to remember the letters in their order, some questionable poet has made the following couplet, each word of which begins with one of these letters:

“At Dover Dwelt John Brown, Esquire,
Good Christopher French And David Fryer.”

As indicated by the initial letters for those months, February and March always enter on the same day of the week, except in leap year.

Month: take up Potatoes and other roots: secure them from wet and frost; collect Pumpkins and Winter Squashes: and expose them to the wind and air on a dry bench before they are stowed away; tie up full-grown plants of Endive in dry weather for blanching. Jerusalem Artichokes may be dug up for winter use.

NOVEMBER: Cabbage may be taken up and laid in rows against a ridge, so as to form a square, compact, close-growing bed, the roots and stems being
buried up to the lower leaves in Cabbages. The beds may then be covered with straw, or a temporary shed erected over them.

DECEMBER. Every thing that needs protection should now be attended to, and if the weather continues open, some of the ground may be ploughed or trenched, to receive the benefit of the winter frosts. Provide manure for another year; dress your Artichoke beds and mushroom beds.
"OVER THE RIVER."

Over the river they beckon to me—
Loved ones who have passed to the further side;
The gleam of their snowy robes I see,
But their voices are lost by the dashing tide.
There's one with ringlets of sunny gold,
And eyes the reflection of Heaven's own blue;
He crossed in the twilight gray and cold,
And the pale mist hid him from mortal view.
We saw not the angels that met him there,
The gate of the city we could not see;
Over the river, over the river,
My brother stands waiting to welcome me.

Over the river the boatman pale,
Carried another—the household pet;
Her brown curls waved in the gentle gale—
Darling Minnie! I see her yet!
She crossed on her bosom her dimpled hands,
And fearlessly entered the phantom bark;
We watched it glide from the silver sands,
And all our sunshine grew strangely dark.
We know she is safe on the further side,
Where all the ransomed and angels be;
Over the river, the mystic river,
My childhood's idol is waiting for me.

For none return from those quiet shores
Who cross with the boatman cold and pale;
We hear the dip of the golden oars,
And catch a glimpse of the snowy sail.
And lo! they have passed from our yearning hearts;
They cross the stream and are gone for aye;
We may not sunder the veil apart
That hides from our vision the gates of day.
We only know that their bark—no more
May sail with us o'er life's stormy sea,
Yet somewhere, I know, on the unseen shore
They watch and beckon, and wait for me.

And I sit and think when the sunset's gold
Is flushing the river and hill and shore,
I shall one day stand by the water cold,
And list for the sound of the boatman's oar.
I shall watch for the gleam of the flapping sail;
I shall hear the boat as it gains the strand;
I shall pass from sight with the boatman pale,
To the better shore of the spirit land.
I shall know the loved who have gone before,
And joyfully sweet will the meeting be,
When over the river, the peaceful river,
The Angel of Death shall carry me.
GENERAL DIRECTIONS FOR COLLECTING AND DRYING MEDICINAL SUBSTANCES OF THE VEGETABLE KINGDOM

From Dr. P. P. Porcher's "Botanical Resources."

All leaves, flowers and herbs should be preferably gathered in clear, dry weather, in the morning, after the dew is exhaled.

The roots of medicinal plants, although more advantageously gathered at certain periods, to be hereafter specified, do not lose their medicinal virtues in consequence of being dug in mid-summer. It is probable that most of those imported are thus collected by savages, or ignorant persons, when the plant is in full leaf, it being then more easily recognized.

Plants, annual, should be gathered at the time when their vegetation is more vigorous, which is generally from the time they begin to flower until their leaves begin to change.

Plants, biennial, should, in most instances, be gathered in the second season of their growth, and about the time of flowering.

Roots of annuals are to be gathered just before the time of flowering.

Roots of biennials are to be gathered after the vegetation of the first year has ceased.

Roots of perennials are to be gathered in the spring, before vegetation has commenced. Roots should be washed, and the smaller fibres, unless they are the part employed, should be then separated from the body of the root, which, when of any considerable size, is to be cut in slices previous to being dried.

Bulbs are to be gathered after the new bulb is perfected, and before it has begun to vegetate, which is at the time the leaves decay. Those which are to be preserved fresh should be buried in dry sand.

Barks, whether of the root, trunk or branches, should be gathered in the autumn, or early in the spring. The dead epidermis or outer bark, and the decayed parts, should be removed. Of some trees (as the elm) the inner bark only is preserved.

Leaves are to be gathered after their full development, before the fading of the flowers. The leaves of biennials do not attain their perfect qualities until the second year.

Flowers should, in general, be gathered at the time of their expansion, before or immediately after they have fully opened; some—as the Rosa Gallica—while in bud.

Aromatic herbs are to be gathered when in flower. Stalks and twigs should be collected in autumn. Seeds should be collected at the period of their full maturity.

Squirrel Skin Shoes.—Squirrel skins tacked down to a board, the hair next to the board, with hickory ashes sprinkled over them, for a few days, to facilitate the removal of the hair, and then placed in a strong decoction of red oak bark, will, at the end of four days, make excellent leather, far stronger and tougher than calf skin. Four skins will make a pair of ladies' shoes.
GOVERNMENT OF THE CONFEDERATE STATES.

JEFFERSON DAVIS, of Mississippi, President, salary, $25,000
ALEXANDER H. STEPHENS, of Georgia, Vice-President, “ 8,000

Private Secretary to President.—Burton N. Harrison, of Miss.

Department of State.—Judah P. Benjamin, of Louisiana, Secretary of State. L. Q. Washington, Chief Clerk. The office of Assistant Secretary is vacant.

To prevent Flies from Wounds and Sores.—Beat elder leaves into a green poultice, and put it on the outside of the dressing. To extract insects after they have got into the flesh, put a poultice of it on the wound or sore. When boiled into a strong tea, it is a good wash for the head, to kill vermin instantaneously, and very good to bathe in. It will kill them wherever it reaches them, if strong enough, and can be used without any injury to the human system whatever.
CONGRESS OF THE CONFEDERATE STATES.

To make a good Light at light Expense.—Take a cup of grease of any kind (lard or tallow) and into it put a sycamore ball, saturate in the same, and then light it—you will have a light superior to two candles. One ball will last three or four nights. The expense will be three or four cents a night—not more, even at the present prices of tallow.

Three dishes from Beets.—A city correspondent furnishes the result of an experiment for making three dishes of vegetables from one plant. He says:

"Beets, as we all know, are very good and very wholesome, when the roots only are cooked in the ordinary manner; but many do not know that the tops make most excellent salad, rivalling, if not surpassing, Scotch kale; and a still smaller number do not know that the stem or shank of the leaf, when cut up and cooked as snaps, make a dish which but very few can tell from the real article. Let any one who wishes to satisfy himself on the subject try it, and he will thank us for suggesting it to him."

Interesting to Weavers of Buff Facings.—The white or buff facing of the Confederate uniform is so easily soiled and so difficult to clean, it is fast going out of use. In defiance of the regulations, our officers are having their coats made plain without any facings. In the English army many regiments have white or buff facings, and they find no difficulty in keeping them perfectly clean. A little dry pipe clay well rubbed into the cloth, and then brushed out, is the only means used by them. If the cloth is greasy, make the pipe clay into a paste with a little water, rub this paste on the cloth with a piece of sponge or any other suitable thing, dry it well, rub the dry powder in and brush out; it will clean both the cloth and lace. A coat can be cleaned in this way in ten minutes.

A Cure for the Itch.—A gentleman who has tried the remedy informs us that Alum water is a certain and infallible cure for that troublesome disease, the Itch. Wash five or six times, all over, with the water, and the cure is effected. The gentleman who gave us the information had been cured thoroughly of the camp itch in its worst form.
RATES OF POSTAGE:

WITHIN THE CONFEDERATE STATES OF AMERICA.

ON LETTERS.—Single letters or parcels, not exceeding a half ounce in weight, for any distance within the Confederate States, 10 cents. An additional single rate for each additional half ounce or less. Drop letters 2 cents each. In the foregoing cases, the postage to be prepaid by stamps or stamped envelopes. Advertised letters 2 cents each additional.

ON PACKAGES.—Larger packages, containing other than printed or written matter—money packages are included in this class—are rated by weight as letters are rated, and charged the rates of postage on letters. In all cases postage to be prepaid by stamps or stamped envelopes.

ON NEWSPAPERS—Sent to regular subscribers, one cent for each paper weighing more than three ounces, and for each additional ounce or fraction of an ounce, one-half cent additional on each paper. Periodicals published oftener than semi-monthly, to be charged as newspapers. On other periodicals sent to actual subscribers, one cent on each number, not exceeding one and a half ounces, and one cent on each additional ounce or fraction thereof. Postage to be prepaid quarterly in advance at the office of delivery.

ON TRANSIENT PRINTED MATTER.—Every other newspaper, pamphlet, etc., not exceeding one ounce, one cent; and for each additional ounce, or fraction thereof, one cent.

The postage on books, bound or unbound, not weighing over four pounds (the limit), is two cents on each ounce or fraction of an ounce.

The postage on all transient matter and books shall be prepaid, except when sent by any officer or private of the army, as provided in the act of July 29th, 1861. (See below.)

FRANKING PRIVILEGE.—The following persons only are entitled to the franking privilege, and in all cases strictly confined to official business: The Postmaster General and his chief clerk; the Auditor of the Treasury for the Post Office Department, and deputy postmasters.

By an act of Congress, approved July 29th, 1861, letters written or sent by any officer, musician or private in the army, may be transmitted through the mails without prepayment of postage, provided said letters shall be endorsed with the name, etc., and shall be on account of the individual sending the same. A similar privilege is given to members of Congress. In both cases, the postage is paid by the persons receiving the letters.

Obnoxious to Bed Bugs and Flies.—Coal oil is said to be a sure destroyer of bed-bugs. Apply plentifully with a small brush or feather in the places where they most do congregate. The cure is effectual and permanent. Gilt frames, chandeliers, &c., rubbed lightly over with coal oil will not be disturbed by flies.

Valuable Table.—The following is the established weight of various articles of produce:

A bushel of wheat, sixty pounds.
Of shelled corn, fifty-six pounds.
Of rye, fifty-six pounds.
Of corn on the cob, seventy pounds.
Of oats, thirty-five pounds.
Of barley, forty-eight pounds.
Of potatoes, sixty pounds.
Of beans, sixty pounds.
Of bran, twenty pounds.
Of clover seed, sixty-two pounds.
Of timothy seed, forty-five pounds.
Of flax seed, fifty-six pounds.
Of hemp seed, forty-four pounds.
Of buckwheat, fifty-two pounds.
Of blue grass seed, fourteen pounds.
Of castor beans, forty-four pounds.
Of dried peaches, thirty-three pounds.
Of dried apples, twenty-four pounds.
Of onions, fifty-seven pounds.
Of salt, fifty pounds.

Harness Blacking.—Take of common yellow beeswax one ounce and a half; mutton suet, four ounces and a half; turpentine, half an ounce; ivory black, three ounces. Melt the wax in a vessel over a fire, then add the suet, and when both are melted add the turpentine. Remove the mixture from the fire, gradually stir in the ivory black and continue to stir and knead the mass till it is cold. It is to be used with a brush, in the ordinary way. This blacking is not only suitable for harness, but is said to be a most excellent water-proof blacking for boots and shoes. It contains nothing that will injure the leather but preserves and gives a brilliant appearance.

For making Copperas.—Take a stone jar, fill it with pieces of rust, scraps of iron, fill the jar with very strong vinegar, cover it, and let it stand for two weeks. One quart is equal to a pound of copperas.

### CONFEDERATE STATES COURTS

The District Court, Judge Asa Biggs, sits according to circumstances in June and November. Geo. V. Strong is the District Attorney; W. M. Watson, Clerk; Wesley Jones, Marshal.
The Treasury Building, formerly known as the Custom House, fronts on Main and Bank streets, midway between 10th and 11th sts.

The President's Office is on the third floor of this building, first stairs to the right of Bank street entrance.

The office of the Secretary of Treasury is on second floor, in front part—same entrance.

The Register's Office is on same floor, right hand side of Bank st. entrance.

The Treasurer's Office is on first floor—entrance from Main street, opposite Farmers Bank.

The First Auditor's Office is over Bank of Commonwealth, Main st.

The Second Auditor's Office is in the building formerly occupied as Monumental Hotel, corner of Grace and 9th streets.

The Comptroller's Office is at the corner of Main and 6th streets, ('Arlington House,')

The City Post Office is under Spotswood Hotel, Main street.

The Medical Purveyor's Office is on Pearl or 14th street, between Main and Cary.

The Department of State is on the third floor of the Treasury Building—ascend by stairs nearest Main street.

The War Department Building, formerly known as Mechanics' Institute, is on 9th street, between Main and Franklin streets.

The Secretary of War, and Adjutant and Inspector General, are on the first floor of the building. See the signs.

The Post Office Department is in the stuccoed building corner Bank and 11th streets.

The Navy Department and Surgeon General's Office are in War Department Building, 2d story, right hand side.

The Ordnance Bureau and Attorney General's Office are on same floor, right hand side.

The Commissary General's Office is on south side Main St., between 9th and 10th.

The Quartermaster General's Office is at corner of Bank and 10th streets.

The Transportation Office is on Bank street, 3d door from 10th.

Volunteers wishing to be transported to their companies can do so by calling at the Quartermaster’s Department in the Blues’ Hall, on Bank st, between 9th and 10th sts.

The Government Offices open at 9 A. M., and close at 3 P M.

Substitute for Coffee — A writer in a London paper, on the authority of the celebrated German chemist Liebzig, says that the seeds of asparagus, toasted and ground, make a full coffee, not easily distinguished from Mocha. The seeds are easily forced from the berries by drying them in a moderately warm oven and then rubbing them on a sieve. The experiment is worth trying.

Remedy for Burns. — The white of an egg has proved a most efficacious remedy for burns. Seven or eight successive applications of this substance soothe the pain and exclude the air from the burned parts. This remedy is said to be preferable to collodion or even cotton.

Hog Cholera — Infallible Remedy. — This terrible disease has played sad havoc among the hogs of the land, and any remedy that tends to arrest its progress, would be received with delight by those who own this most invaluable animal. A gentleman has furnished us a simple recipe, which may be relied upon as an effectual and almost infallible remedy. With it he has cured many hogs that were failing under this disease, and has never known any to die to which the medicine has been administered:

Take equal proportions of pine tops and poke root, and boil them down to a strong tea; to every five gallons of the tea, add a tablespoonful of copperas and half a pint of salt.

This is a remedy that is within the reach of every person, and we advise its trial.

To take out pitch, tar, resin, paint, &c., pour a little alcohol on the place, and let it soak in about a half an hour. Then rub it gently, and you will find the alcohol has soaked out the glutinous quality, so that it will easily crumble out.

To take Stains out of Silver. — Steep the silver in soap-lye for the space of four hours; then cover it with whiting, wet with vinegar, so that it may lie thick upon it, and dry it by a fire; after which rub off the whiting and pass it over with dry bran, and the spots will not only disappear, but the silver will look exceedingly bright.

To Mend Iron Pots. — Mix finely sifted lime with some white of an egg till a thick kind of paste is formed; then add some iron filings. Apply this to the fracture and the vessel will be found to be nearly as sound as ever.

Whooping Cough — Dr. Wilsell, of South Carolina, recommends the use of nitric acid diluted and sweetened, so as to resemble lemonade, as a palliative in whooping cough. He lets his patients drink as much as they please of it.
