\frac{d}{dx} \left[ \sum_{i=1}^{n} z_i^{(k)}(x) \cdot y_i(x) \right] = \frac{d}{dx} \left[ Z_k^T(x) \cdot Y(x) \right]

And the whole earth was of one language and of one speech. And they said: ‘Come, let us build us a city, and a tower, with its top in heaven, and let us make us a name; lest we be scattered abroad upon the face of the whole earth.’ And the Lord came down to see the city and the tower, which the children of men builded. And the Lord said: ‘Behold, they are one people, and they have all one language; and this what they begin to do; and now nothing will be withheld from them, which they purpose to do. Come, let us go down, and there confound their language, that they may not understand one another’s speech.’

Outstanding Faculty
"... a friend as well as a teacher ... his lectures themselves weren't unique, but he had a certain glow that made everything he said sound fascinating ... he put his concern for students above his concern for his job ... the finest man I've ever met ... capable of communicating with everyone ... he broke down the barriers of the institution and created a community ... "
Ernest Hunt

"... a man who enjoys his work makes every student feel important. Stimulating professor, excellent teacher goes out of his way to help students with any problem. My best preparation for med school was his teaching makes impossible material seem almost learnable..."
David Johnson

"... a brilliant teacher... not afraid of controversy... some students love him and some hate him but everyone learns from him... has accomplished an amazing amount for such a young man... captivating and sarcastic... really makes his courses come alive... perhaps the quickest mind on campus..."
William Lemonds

. . . has a sincere interest in Emory students and the Emory community . . . knows how to inspire his students to achieve more than their best . . . I learned more in Music 101 than in 10 years study of piano . . . he makes learning a lively, rich experience . . . ”
Leon Mandell

"... knows what he's talking about ... I went to class every day ... he made organic chemistry an esthetic experience ... an outstanding teacher with a tremendous amount of energy, intelligence, and humor ... a professor who has a sincere desire to teach and who succeeds in doing so ... no comments are necessary ... a damn good teacher ... communicates his interest to the students ... "
Bonnie Strickland

"... She's fantastic ... a great teacher ... her interest in the students and their outlook is unique to my experience at Emory ... She has the ability to stimulate interest as well as to be interested ... shows active concern for and involvement with students ... best prof I've ever had ... "

SELECTING YOUR LABORATORY

With Dentists who know values, the primary consideration when it comes to Laboratory service is technical knowledge and skill. Reputation — "record of performance," is of utmost importance. Reputations are built slowly, over a long period of years by fine quality and superior service. When it comes to selecting your laboratory, the deciding factors are quality, service, prestige — and other considerations less tangible than price, but much more important.

We have been in this business for fifty-seven years: this accumulated store of knowledge and experience is at your command.

Dooley's Diary

Dear Diary,

Since I am such a notable character anyway, I'm really not amazed at all to find myself here at Manuels soaking my old Irish bones with beer at one of the best wakes I've ever attended—at least since Finnigan's. Yes, this is it, friends and here I am, S. Clarence O'Dooley, all neatly arranged in my coffin on the bar looking up and trying very hard to remember that I really am dead—it's so hard after being a full-fledged ghost all these many years . . .

I should have known what was coming though long before the old man called me up and asked me to turn in my ID card ... but old skeletons never die ... and so before I knew it I was fading away ... I must remember to be quiet ... but everyone seems to be having such a good time ... I may not have had a good week this year, but I sure am having a good wake . . .

Someone's making a toast to me ... beer foam right in the eye socket ... socket to me ... that was September's word ... and nano ... yesyes ... and the freshmen were at freshman camp ... at Rock Eagle dank and damp ... and the food was not too good ... but we all understood and when they came back tried to sell them activities cards and meal tickets so that they could really become Emory students ... ye olde rite de passage ... like rush or finals . . .

Helen Jenkins offered food specials while sororities offered punch and I felt right at home . . . and home is where the heart is thumpthumpthump ... humphumphump ... and it was elections ... nixnixnix ... phoenix ... archon ... wheel ... we all know how you feel . . . didjaeverhearttheone about the girl who went to the infirmary with appendicitis and came out convinced that she was having a miscarriage . . . ah, yes things were normal at ole emory . . . and I, as patron saint of liberal education, southern style, just sauntered along . . .

I was surprised at the Buffy Saint Marie concert but I figured that it was nothing to worry about . . . even emory could lapse into consciousness . . . little did I know what dire forebodings forbade . . . after all the IFC was still considering The Report . . . and Derrick was editing the wheel . . . and we all were going in our accustomed circles . . . viciously . . . and in the higher circles someone mentioned money $$$ and the circle got more vicious . . . moneyfunny . . . but since we'd bought our activities cards, we collected our phoenixwheelarchonconcert and went merrily on our emoryway to finals . . .

I remember talking to Derrick about the last issue of the wheel that quarter—the one that worried me . . . all that talk about library hours great speckled bird conduct hearings tenure ... I thanked him for waiting until the last issue of the quarter for bringing all this up and spent the next two weeks with Dean Beall talking about the emory we know and love . . .

We all love Otis too . . . our token dog who somehow got hairier winter quarter . . . funny, so did most everyone else . . . pro-
tection from the cold... I feel old, I feel old, I shall wear the bottoms of my trousers rolled... if I wore trousers... nowsirs, nowsirs... Stokeley Carmichael was here... now, how... he really rattled my bones... the times are surely out of joint... and the Orkin man said what's a joint like you doing with a roach like that... Steve Abbot was convicted for refusing to serve in the Armed Forces of the U.S.A... U.S. And Dean Zeller announced his resignation... and I began to feel better... those two guys make me nervous... and old... but then they inaugurated trickydicky (I knew him when... I used to work at Whittier College) and lots of emory people went to join in the festivities... I always knew our people would respond to responsible freedom... they raised the tuition also—tuition—emory’s fruition and the fruits got ripper every day... and so Dean Beall scheduled a garbage tour of the Row while the IFC was still considering The Report... 

I began to notice that people were talking about dorm rights and dorm wrongs and even though I wasn’t doing the agitation people were still agitated... no one had even blown a whistle... people were talking about Cox racism student rights community service and no one was talking to me except George Fox who’s always been my best friend... talkingwalking... and all those people went to Worth County...

SGA charted SDS and someone said something about ROTC and for the first time in years a shiver ran down my spine... probably the cold... I guess I’ll have to grow some hair... seems to be working for everyone else... but the quarter ended before I froze and so I decided to stick it out, hairlessly because next quarter and spring quarter is mine...

Spring has sprung... the trees are hung... with flowers... Time of rebirth... of joy on the earth... of sleeping and eating for hours... ours... emory’s... mine... no, now it’s yours... and I, Dooley, for the first time since I’d been at emory felt like I wasn’t needed... I grow old... and so... it’s so hard to leave...

I sat back and watched... Haynes and Beckham ran for SGA president and actually campaigned on issues... I was amazed because I thought the only emory issues was the wheelarchonphoenix... and the students actually demanded some say in their own affairs... and the chemistry department said no, students are students and they should devote their time to study...

PRESTOCHANGO... dialogue... and my best friend George even devoted a column to controversy for a change and craftily got around the "non-existent" censorship on campus publications... some guys left devious... and then I saw the students stand up, make demands on the university and I knew that they wouldn’t be satisfied with being let out of class on the sound of a whistle... the whistle had been blown... the seeds had been sown... and people had spring fervor... and then, I really grew old and I realized how tired I was... that’s an awful lot of responsibility—being the spirit of a whole university by yourself... spirit... and while I watched I thought about how good it felt to have someone else do what they should have been doing all along but what you have been doing for them... I’m just emory’s harmless ghost... and now I’m not even emory’s ghost anymore because emory doesn’t need a ghost... I’m a skeleton in the closet and I’m loving it... especially when the closet is Manuel’s... bury me not on the lone prairie... emory’s ex-good fairy... eat drink and be merry... emory’s finally awake.
